The Hub of Environmentalists

Company Vision:

Octavve Manufacturing Pvt Ltd Environmental Consultants is a Specified consulting and Engineering firm that works with domestic, Commercial and Industrial Clients to address new ventures and complex problems regarding water treatment. We design and construct complete water treatment installation for the preparation of drinking and processed water, and for the treatment of communal and industrial waste water. We also carry out activities in the field of environmental technologies, such as groundwater treatment and remediation, Diffused air flotation(DAF), Lamella Separation, Membrane Bioreactors (MBR), Ultra Filtration (UF), Nano filtration(NF) And Reverse Osmosis (RO).We Offer Quality and Services to our customer along with wide range of industrial, Domestic and commercial water treatment and waste water treatment application of chemical engineering, environmental studies. The Company Began in 2012 as a Water Treatment Consulting Services and then eventually with the time, exposure and experience got into Manufacturing, Installation, Operational Maintenance and Service of Streams like STP, ETP, UV, WTP,RO, Ozonation ETC and made it a Practice. We are committed to amaze our clients by accepting challenges and providing customized solutions. That drives the force within to take ourselves up every way, a force that enhances our ability to deliver our purpose of being relentless ally for the success of each and every project we work on. Our list of completed project includes MI SWECO- A Schlumberger Company (Mumbai), Air Liquid (India) Holdings Pvt Ltd (Chakan), Indian Navy (Mumbai), J.D.Engineering (Mumbai), GAIL (India) Limited (Vadodara), Mitsuchem Plast Limited(Boisar) etc. Our success is based in our close attention on engineering approach and attitude towards it which uses the latest design, Engineering and analysis tool to provide the most reliable, efficient-accurate analysis and understanding with our clients just like working together to ensure the highest quality work, on time and budget based in more than 4 years of experience.

Company Mission:

Our Commissioning and startup projects enable us to be more effective in an operation designs approach for our customers. With customer satisfaction as our goal, we develop partnerships and provide services to meet client's financial and operational constraint. We believe that this approach provides the most cost effective project, in the most demanding industries and customer application. Our only practice is to provide sustainable and appropriate technical solutions with a positive social environment and fair working style.

Company Culture:

We have fostered a culture of service and innovation with many diverse and talented professionals like experienced chemical, Mechanical and civil engineers working together to provide multidisciplinary engineering services like Manufacturing, Operation, Monitoring, Filtration and Maintenance etc.

Research and Development:

We have Technical Staff to develop orientation for Water and waste water industry by advance developing system. We develop equipment design related more efficient procedures and practice for implementation through project knowledge.

Service and Excellence

Our services range from consulting to providing full design-build-operate solutions. We not only manufacture exceptionally high-quality systems, but we also offer design services, training, equipment commissioning, and maintenance after the initial installation. Octavve Manufacturing Pvt Ltd Environmental Consultants provides solutions for all facets of water & wastewater management including:

- Equipment Supply
- Budget pricing
- Project management
- Operation & Maintenance of systems ETP /STP/ RO/ Swimming Pool ETC
- Training and education
- Analysis and Monitoring
- Plant installation
- Site analysis and cost reduction activity's
- Treatment Studies & Project Cost Estimation
- Turnkey Installation
- System Relocation
- Servicing & Revamping of Existing Plants
- Automation & Cost Saving

Components

Components play a major role in breakdown. We have good business relation with all the components manufacturer & maintain stocks of important spares. We supply all the components related to water & waste water, be it Spares, Valves, Media, Panels & Chemicals.

Some of the Components are as listed :

- SAFF Media, FAB Media, MBBR Media
- Bio Pac Media & Fill Pac Media
- Fine & Coarse Bubble Disc Diffuser
- Tube Settler Media
- FRP Pressure Vessel , MSRL Pressure Vessel & Piping
- SS316L Tube Pipe, SS Bends & SS Valves
- Auto Valves
- SS Diaphragm Valve, Butterfly Valves , Diaphragm Valves
- Bacta Cult (Bacterial Culture)
- Filter Housing, Cartridge Filter & Bag Filter
- Ion Exchange, Resin, Activated Carbon & Sand Filter Media
- Chemicals for STP, ETP , Cooling Tower, Boiler, RO, DM, Softner Etc
- Pressure Gauge, Pressure Switch, Flow meters & many more
